

★PILOT UTILIZATION FIELD (11XX)

Introduction
(Changed 31 Oct 23)

The Pilot Utilization Field encompasses all functions performed by rated pilot officers to conduct or directly support flying operations, including combat, combat support, and training missions. Inherently included are supervisory and staff functions such as inspection, contingency planning, and policy formulation.

Specific instruction on use of certain AFSCs:

Identify pilots with 11XX specialties appropriate to the type of missions and weapon system involved. Use the following prefixes to identify additional rated qualifications and experience, and unit manpower document positions that require these capabilities:

- A Operational Warfare Instructor
- B Squadron Operations/Operations Support
- C Commander
- E Electronic Warfare
- F Aircraft Systems Flight Evaluation
- G Automated Systems Program Designer
- H Military Consultant to the Surgeon General
- J Parachutist
- K Instructor for weapon system designated by AFSC
- L Aircrew Flight Equipment
- M Medical Service Specialist (Physiological Training Instructor)
- Q Standardization or Flight Examiner for weapon system designated by AFSC
- R Contingency/War Plans
- S Safety
- T Formal Training Instructor
- U Information Operations
- V Automated Functional Applications Analyst
- W Weapons and Tactics Instructor
- Y Analytical Studies

Identify pilots serving as instructor pilots in undergraduate pilot training and formal training units (FTU) with a T prefix. Do not award a T prefix to instructor pilots in operational units. Prefix K identifies these instructors and authorizations.

★Pilots assigned to duty as Aerospace Physiology Instructors, after completion of formal training, may be identified by prefix M. The CFM, Aerospace Physiology, HAF/A3TH, validates positions and awards the AFSC.

Identify requirements for staff officers above wing level with a staff AFSC (11X4), where appropriate. Not all positions above wing level qualify for the staff AFSC. For those positions above wing level, Manpower will use the staff AFSC requirements for determining applicability: **Staff Air Force Specialty Code**—Identifies an officer position above wing level specifically on the duty requirements of the role performed, not the fact that the authorization is on a staff above wing level. Use staff AFSCs (XXX4) to identify **planning** and **policy-making** positions **above** wing level. It requires the same skills as those for the qualified AFSC (XXX3), but applied to **developing broad policies, plans, and procedures**. Management responsibility increases without a corresponding increase in knowledge of the technical aspects of the function. Qualified officers filling/have filled such positions are awarded the staff AFSC. Award individuals possessing a qualified AFSC (11X3) or a staff AFSC (11X4) upon assignment to a position so identified.

Qualification level 3 designates a pilot qualified as an aircraft commander in the assigned specialty or credit. Level 2 identifies qualification as a copilot, if appropriate, for a specific system. Level 1 identifies rated pilots at the entry level for their specialty.

Current aeronautical rating and qualification for aviation service according to AFI 11-402, *Aviation and Parachutist Service, Aeronautical Ratings and Badges*, are mandatory for award and retention of pilot AFSCs. See AFMAN 36-2100, *Military Utilization & Classification*, for policy on retention or withdrawal of rated AFSCs for personnel disqualified from aviation service or placed in an inactive status.
